# Toby and the Bee

By: Michelle Martinez

Bees produce nature's best  
sweetener: honey.

It is very healthy, and a better  
alternative to sugary foods

*Bee's also help the land grow  
delicious fruits and vegetables.*

*They feed a lot of the animals we  
eat for nutrition such as cows,  
pigs, and chickens.*

Toby learned his lesson and started handling bees with more care. He also began taking care of the environment so that there will never be a future without bees.

*Toby ran to his mommy for help!*

MOMMY!

Toby got stung by a bee!
